## Web 2.0 ready for Gen Y to Gen Me audiences

### Campus Friendly Features

- Affordability and Scalability** As the product is built using Microsoft technology, educational institutions already enjoy academic license discounts for hardware and software required to run **i3Campus**. The product is design to support large number of users, from tens of thousands to hundred thousands, so you can breathe easy knowing the growth path is not stymied with difficult migration or licensing plans.
- Standards Compliance** The system is designed to strict industry standards and specifications such as AICC, SCORM, IMS. Content with similar compliance standards can be readily deployed on **i3Campus**. The system could also be easily integrated with other LMS and content management systems and any back-end systems.
- Multilingual, Unicode** **i3Campus** has pre-set languages such as English, simplified Mandarin, traditional Mandarin and Bahasa Melayu. It can be customised to support other Unicode languages.
- Rapid Deployment** A standard off-the-shelf system that can be up and running within 5 man days.
- Fully Customizable** Highly flexible platform with multi-tier, template-based architectural design can be customized extensively to suit customer's requirements.
- Ease of Integration** The System makes use of a standards-based software technology that allows it to bridge the communication gap with other enterprise systems.
- Proven System** Educational institutions enjoy low total cost of ownership, high customisability, local support, product scalability and a no-nonsense deployment methodology.
- Interoperability** **i3Campus** is built to international standards and specifications to enable it to import the content created using these standards. It is also capable of creating, importing and exporting course content from or to other systems. It also supports interoperability in managing assessments. The system uses IMS QTI standards for its assessment engine.
- Mobile and Smartphones** **i3Campus** can be customized to authenticate access and integrate contents from mobile PDAs, touch tablets and smartphones, befitting today's advanced consumer technology; and ensuring continuous access by the children of today.
- SMS Integration** **i3Campus** can be integrated to device SMS or server SMS to allow fast transmission and reply in situations of last minute class and timing changes.
